## YASKAWA

## Results Briefing for FY2024 (Ended February 28, 2025)

Notes:

- From FY2024, we revised the segment classification of PV inverter, which had been included in the System Engineering segment, to be included in the Motion Control segment. As a result, the figures for FY2024 are shown based on the revised information. Figures for FY2023 are also presented based on the revised information. (See page 22.)
- The information within this document is made as of the date of writing. Any forward-looking statement is made according to the assumptions of management and are subject to change as a result of risks and uncertainties. YASKAWA Electric Corporation undertakes no obligation to update or revise these forward-looking statements, whether as a result of new information, future events, or otherwise.
- Figures in this document are rounded off and may differ from those in other documents such as financial results.
- The copyright to all materials in this document is held by YASKAWA Electric Corporation. No part of this document may be reproduced or distributed without the prior permission of the copyright holder.

### FY2024 Full-Year Results

- → Revenue…YoY:-6.6%
  - Revenue decreased due to the impact of a significant decrease in revenue in the Motion Control segment, compared to the previous fiscal year which was supported by a high level of backlog of orders

#### ➔ Operating profit…YoY:-24.3%

- Despite efforts to reduce overhead costs, profit decreased due to the significant impact of a decline in profit resulting from a decrease in revenue
- → Profit before tax…YoY:+13.6%
  Profit attributable to owners of parent…YoY:+12.4%
  - Profit before tax and profit attributable to owners of parent increased due to the transfer of a portion of shares of an equity-method affiliate

#### → 4Q Order …YoY:+15%, QoQ:+5%

 $\cdot$  Order increase was led by AC servo motors in Japan and AC drives in the Americas.

## FY2025 Full-Year Forecasts

- Both revenue and operating profit are planned to increase by steadily capturing the recovering market demand and optimizing production and sales in line with the current demand trends.
- The assumed average forex rates are set at stronger yen compared to the previous fiscal year in light of the current forex rate situation.
- The dividend forecast for FY2025 remains unchanged from the previous fiscal year. (Annual dividend of ¥68 per share)

| Profit attributable<br>to owners of parent | ¥ 57.0bn.  | ¥ 50.7bn.  | +¥ 6.3bn.  | +12.4% |

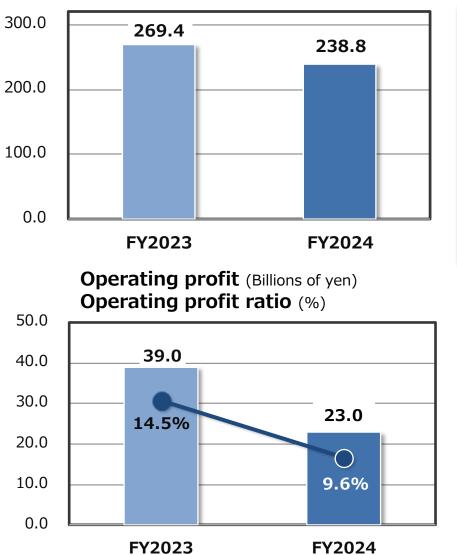

#### FY2024 Financial Results by Business Segment

- In Motion Control, operating profit decreased due to the large impact of a decrease in revenue.
- In Robotics, while revenue slightly increased, operating profit decreased due to a decline in the production utilization rate and upfront investment.
- In System Engineering, although revenue decreased due to the impact of the sale of a subsidiary, operating margin improved due to the effect of business structural reforms, as well as the increase in revenue of mainstay businesses.

#### Business Segment Overview: Motion Control

#### **Revenue** (Billions of yen)

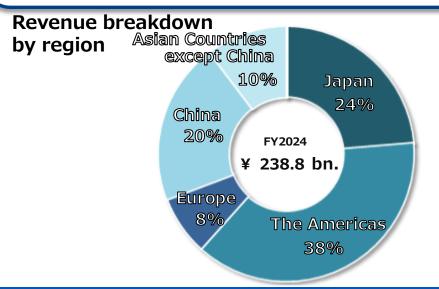

#### [Revenue]

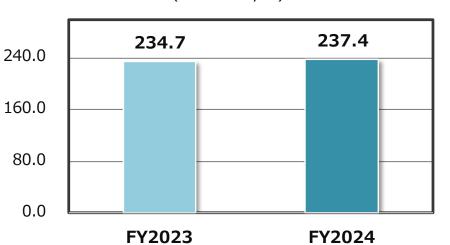

- In AC servo & controller business, while semiconductor-related sales remained firm in the U.S., recovery of the demand including that of the electronic components market was delayed in Japan. Although there was a moderate recovery in the Chinese market toward the end of the fiscal year, capital investment remained generally weak, and demand was sluggish in Europe. As a result, revenue decreased.
- In Drives business, despite strong sales of PV inverters, revenue decreased from the previous fiscal year, which was supported by a high backlog of orders.

#### [Operating Profit]

• Operating profit decreased due to the large impact of a decline in profit resulting from a decrease in revenue, despite efforts to reduce expenses.

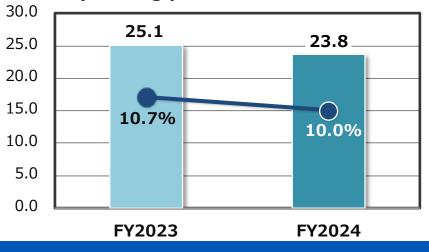

#### **Business Segment Overview: Robotics**

Revenue (Billions of yen)

#### **Operating profit** (Billions of yen) **Operating profit ratio** (%)

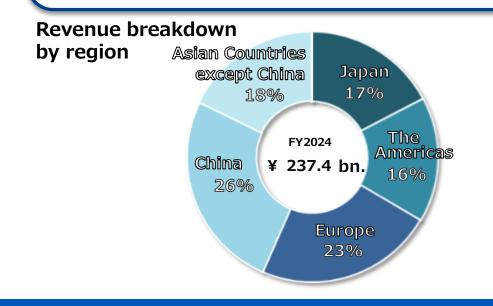

#### [Revenue]

- In the automotive market, while capital investment as a whole remained sluggish, sales of large-scale systems projects from backlog contributed.
- Sales of wafer transfer robots for the semiconductor market increased. As a result, revenue slightly increased.

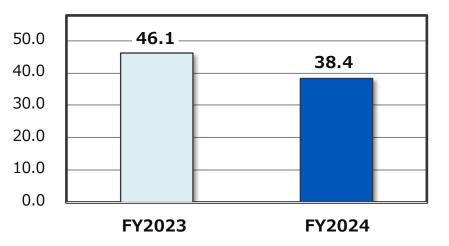

#### [Operating Profit]

• Operating profit decreased mainly due to a decline in the production utilization rate and upfront investment to strengthen system response capabilities.

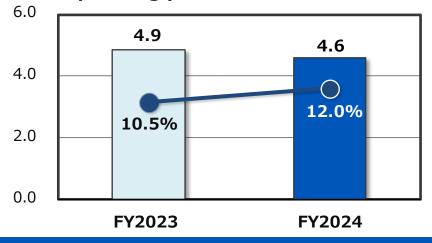

#### Business Segment Overview: System Engineering

#### Revenue (Billions of yen)

**Operating profit** (Billions of yen) **Operating profit ratio** (%)

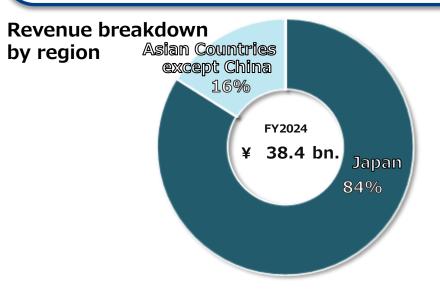

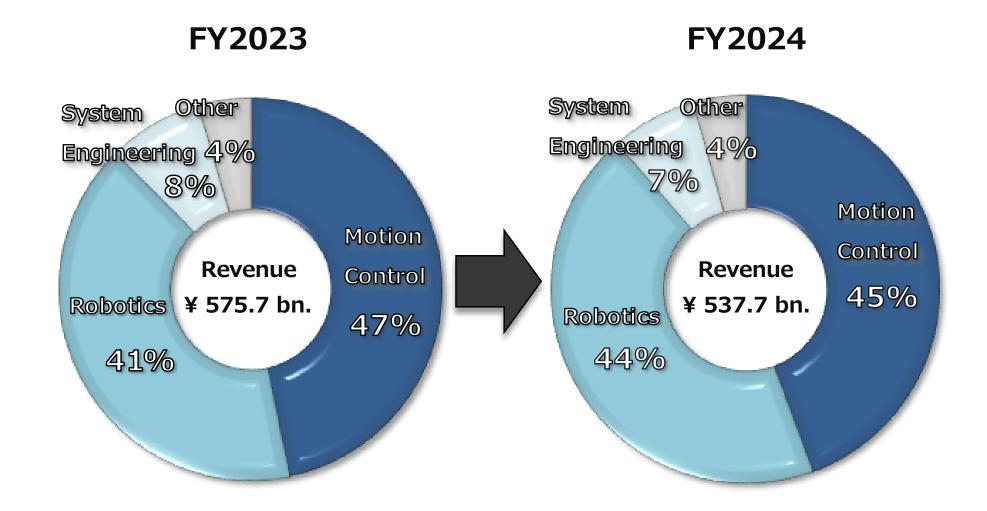

#### [Revenue]

- Sales of core business of steel plants, port cranes, and social systems increased.
- Revenue decreased due to the impact of the sale of a subsidiary related to large-scale wind turbines in the second half of the previous fiscal year.

#### [Operating Profit]

 Although profit decreased due to the impact of the disappearance of gain on the sale of a subsidiary related to large-scale wind turbines in the previous fiscal year, the operating margin improved due to the effect of business restructuring.

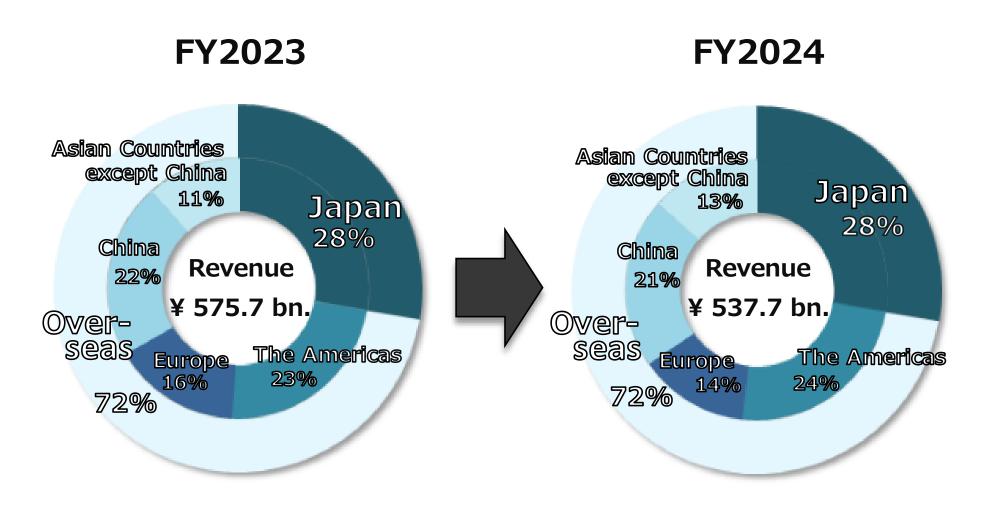

• Revenue decreased in all regions except for Asian countries except China.

#### YASKAWA ©

## **Creating Value through i<sup>3</sup>-Mechatronics Solutions**

#### **Development capabilities**

- Exhibited a demo unit of "MOTOMAN NEXT" at NVIDIA AI Summit Japan (Nov. 2024) and promoted high-speed pick and place task using AI
- Developed the SFA method<sup>\*1</sup> with Toyota Motor Corporation to reproduce expert welding techniques

#### **Production capabilities**

- Installed MOTOMAN NEXT in Robot Factory No.1 and improved productivity through automation and data utilization (scissors gear\*2 assembly process)
- Started the construction of Minami-Yukuhashi Plant in Fukuoka Prefecture to strengthen System Engineering business (Operation starts from FY2026 3Q sequentially)

#### Sales capabilities

 Accelerated the activities of i<sup>3</sup>-Mechatronics CLUB established in 2019 (Approx. 160 companies joined, such as NVIDIA, Kewpie Corporation in Japan)

#### **Contributing to Realizing a Sustainable Society through Business Expansion of Mechatronics Applications**

Concluded an agreement to establish a joint venture for the manufacture of cell therapy products with Astellas Pharma Inc. by utilizing "Maholo", a dual-arm robot designed and marketed for biomedical applications

<sup>\*1</sup> An abbreviation for Sequence Freezing Arc-Welding. A method of welding slowly and carefully by repeating welding and solidification. <sup>\*2</sup> A gear used for noise control and smooth power transmission. It reduces vibration and noise by eliminating gaps between gears.

Scissors gear assembly by MOTOMAN NEXT

### Measures for FY2025

## **Creating Value through i<sup>3</sup>-Mechatronics Solutions**

#### ➔ Development capabilities

- Expansion of market launch of "MOTOMAN NEXT" (transition from verification and evaluation to installation to actual production lines) and expansion of partnership
- Acceleration of transition to solution business by expanding lineup of "iCube Control"
- Expansion of AC drive application by strengthening efforts for cooling solutions for data centers

#### Production capabilities

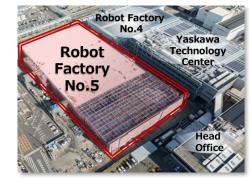

- Build a production system that can flexibly respond to variable-mix variable-volume production by establishing Robot Factory No.5 (scheduled for completion in December 2025)
- Enhancement of global product traceability and promotion of production automation, labor saving, and in-house manufacturing by utilizing Yaskawa's own new products

#### ➔ Sales capabilities

- > Acceleration of sales expansion in the mid-process market for semiconductors including AI chips
- Clarification and implementation of growth strategies in the Indian market, which is expected to expand

#### **Contributing to Realizing a Sustainable Society through Business Expansion of Mechatronics Applications**

- Accelerate development of automated solutions to ensure quality and stable supply in the food industry
- Promotion of commercialization in the agricultural sector through field practices such as harvesting cucumbers and selecting strawberries

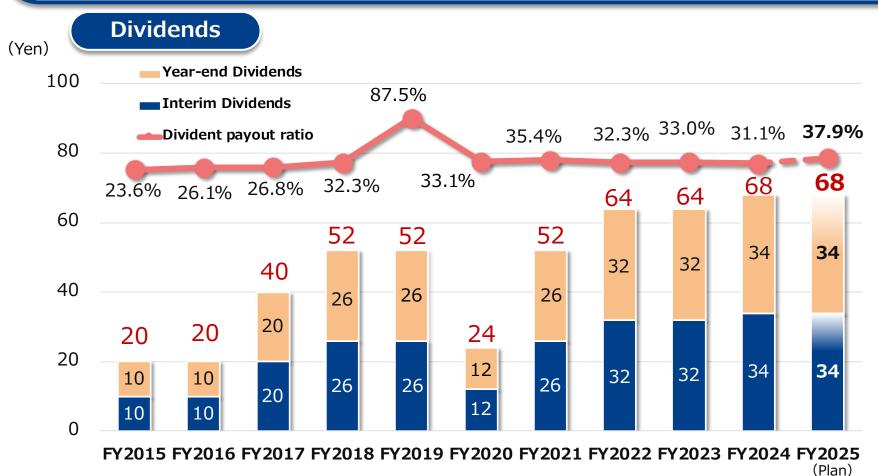

Robot Factory No.5 under construction

Process of strawberry selection by MOTOMAN NEXT

#### Shareholder Return (Dividends)

- In FY2024, an annual dividend was 68 yen per share. (Total payout ratio including share buyback: 47.7%)
- Based on stable dividends, an annual dividend forecast for FY2025 will be 68 yen per share. (Dividend payout ratio: 37.9%)
